PPE Use and Boundaries

Free Printable Worksheet

Medical Courier Specimen Logistics Trades · 9th–12th Grade · 4 Problems · Answer Key Included

A free printable medical courier specimen logistics trades worksheet for 9th–12th grade PPE use and boundaries, with an answer key.

Name:

Date:

1. A courier is assigned to transport a new type of specimen that requires a specialized respirator. The courier only has standard surgical masks in their vehicle. What is the correct procedure?

- A) Attempt to find a different mask at the pickup site without notifying dispatch
- B) Use the surgical mask and proceed, as it provides some level of protection
- C) Skip the pickup and move to the next stop to stay on schedule
- D) Contact dispatch to report the PPE mismatch and wait for proper equipment or instructions

2. Scenario: A staff member asks the courier to wipe down a leaking package and continue the route. What should the courier do?

- A) Pause normal workflow, keep custody secure if safe, and ask authorized staff or dispatch for direction before proceeding
- B) Guess the missing detail and keep the route moving
- C) Leave the item unsecured so the next stop can start sooner
- D) Change the label, order, package, or route record without authorization

3. During a high-volume shift, a supervisor asks a courier to bypass the required glove change between different specimen types to 'catch up' on the route. Why should the courier decline this request?

- A) Because the courier is not authorized to make decisions that violate safety SOPs or cross-contamination protocols
- B) Because the courier's contract only covers driving, not handling specimens
- C) Because the courier needs to wait for the next scheduled break
- D) Because changing gloves is a personal preference for hygiene

4. Why does PPE Use and Boundaries matter in specimen logistics work?

- A) It eliminates the need for route documentation
- B) It helps the courier keep the work safe, traceable, documented, and inside the assigned role
- C) It makes speed more important than safety or privacy
- D) It lets the courier decide clinical acceptability without asking anyone
